

ORPHEUSMEDICAL

Capture. Share. Engage.

A Clear Path to Improved Care

In today's integrated operating suites, procedure labs and ambulatory surgical settings, your team needs to engage across all perioperative settings. The path to improved patient care requires:

- ✓ **Actionable** documentation from initial patient contact through discharge.
- ✓ **Versatility** to capture, store and stream video, audio and images from any source.
- ✓ Real-time **collaboration** and engagement of teams from anywhere across the healthcare enterprise.
- ✓ **Accuracy** in telling your team's story.
- ✓ **Engagement** with the patient with immediate access to video, anytime and from any device.
- ✓ Enhancement of surgical **performance** and **patient outcomes**.
- ✓ Establishing a **quality** system for case review and training.
- ✓ **Sharing** results across the care continuum and completing the patient record.

Orpheus - Your Choice for Surgical Media Management

Introducing: The Clinical Media Platform

- ✓ Start your documentation pre-op with an accurate, actionable and secure mobile video and image application (iOS and Android).
- ✓ Connect your existing video capture source to store video and images (Stryker SDC, Karl Storz AIDA, Olympus, Pentax and more).
- ✓ Accurately load patient demographics and easily start recording, capturing and live broadcasting multiple sources of HD video with the Orpheus CAST.
- ✓ Images and videos are available immediately.
- ✓ Central and secure access from any mobile device (iOS, Android) and desktop (Windows, MacOS). User specific credentials protect patient privacy.
- ✓ Quickly retrieve cases of interest, clip and annotate video and images.
- ✓ Share surgical content.

Access

Orpheus Mobile and Orpheus Web provide anywhere, anytime access to all clinical media. Easily document from pre-op to discharge. Complete your work on the go and gain access to surgical content when you need it.

Care

With the changes in care models and increased responsibilities, it is vital to continuously improve performance and patient outcomes. Orpheus provides tools to analyze performance and build a library of cases for research, teaching and learning.

Collaborate

Orpheus Show provides enterprise-wide live streaming. You can teleconference at will and consult with cross-functional teams. Advanced real-time complication analysis and telestration will save time and improve outcomes.

Create

Orpheus has advanced video and image editing tools designed to help you tell the story. Orpheus Reporting is a multi-media customizable physician report that enhances your narrative.

Communicate

Export results to the patient record (EMR) and long-term archive (PACS/VNA). Create presentations for conferences and share with colleagues. Share with the referring physician and the patient.

Engage

Orpheus offers unparalleled ways to engage clinical teams. Immediate access to videos and images is the key to a continuing patient engagement.
