

# Orpheus: Complete Clinical Media Solution

Orpheus is a scalable platform for advanced clinical media management enabling efficient surgical workflow, smarter collaboration and enhanced interoperability. Orpheus standardizes the way you capture, stream, and collaborate using clinical video and images across the care continuum.

## Capture

An all-in-one vendor-neutral medical-grade device to capture full 3DHD video from multiple sources.

## Archive

Integrated with the electronic medical record, centrally storing media for on demand access anytime, from any device.

## Stream

Live streaming to any device allows consultation with an expert that could achieve better outcomes.

## Treasure

Easily manage content and use throughout the perioperative process with an enhanced experience to build your clinical video library.

## Enhanced Collaboration

Orpheus applications enable broader collaboration between clinicians. Automating the distribution of videos and images across multiple specialties and referral networks drives workflow efficiencies.

Orpheus helps enrich patient interactions by empowering physicians to digitally share patient centric videos, images and annotations on any device.

## Across the care continuum

### Preoperative

Use video to plan for surgery.

### Intraoperative

Capture and stream videos and images.

### Postoperative

On demand access from any device and create richer content.

## Clinical Specialties

- Robotic Surgery
- Laparoscopy
- Endoscopy
- Orthopedics
- Women's Health
- Urology
- Bronchoscopy
- Neurosurgery
- Thoracic
- Ophthalmology

# Efficient and Rich Interoperability

Orpheus is fully integrated with the electronic medical record and promotes interoperability.

Orpheus offers a total experience for clinical media to empower physicians to collaborate over video and images.

## Privacy

Orpheus applications help providers and covered entities to comply with privacy requirements.

## Security

Mitigate the risk in using other storage and transport methods. Securely access clinical media.

## Plug and Play

A scalable single point of integration allows deployments to range from single room to enterprise installations.

## Industry standard

Connect to any electronic medical record and imaging platform to raise the level of interoperability.

## About Orpheus Medical

Orpheus Medical, an Intuitive Company, brings documentation workflow automation and surgical media management solutions to health systems around the world.
